Week 2 (code-S)

Full Stack Development with Python and DJango

What Is A Function?

$$F(X) = 2X+1$$

Recall from your maths class. A function takes input and gives output.

Loops?

Loooooooooooooop

A loop allows a program to repeat several times.

Lists
&
Dictionaries.

Data Structures

A data structure in programming is a special type of variable that allows the program to store and retreive data in a specific way.

Full Grading System.

- Record student info.
- Record grades of students.
- Print grades report.
- Calculate statistics.
- Calculate GPA.
- Calculate CWA.
-

Full ATM Simulator.

- Ask Pin Code
- Check Balance
- Withdraw Cash
-

Modules, Packages, Objects & Imports.
